EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Tiajolloff on May 21, 2010. In the interview, a request for a terminal disclaimer for U.S. Patent No. 7,681,416, was requested since the amended claims of the instant application are similar to claims 8-10 in US Patent No. 7,681,416, which shares a common assignee with the instant application.

Furthermore, the application has been amended as follows:

In claim19, line 2, the "second lower hollow cylinder has an inner diameter" has been amended to read as - - the second lower hollow cylinder of the axial cylinder composite has an inner diameter - -.

2. The following is an examiner's statement of reasons for allowance: The closest prior art teaches combining an upper/first and lower/second hollow cylinders and inserting several core rods within the cylinders. The structure is subsequently fused together and drawn into an optical fiber. However, the prior art fails to teach producing a constriction in the inner bore in the upper hollow cylinder as a result of drawing out the second lower cylinder with a core rod, wherein the constriction is subsequently used to support a second core rod for drawing into a second optical component. In the prior art, all the rods and tubes

Art Unit: 1791

are stacked together, with no constrictions, and fused to assemble the structure.

This does not allow for a constricting step prior to the insertion of the second core rod.

3. On the other hand, there are prior art that teaches producing a constriction at a lower end of the lower hollow cylinder for supporting a core rod. However, the prior art fails to teach or fairly suggest an upper hollow cylinder that is fused to the lower hollow cylinder that is subsequently used to support a second core rod for producing a second optical component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to QUEENIE DEGHAN whose telephone number is (571)272-8209. The examiner can normally be reached on Monday through Friday 8:30am - 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
